

# Compound Leverage Gutter Tools

## Reproduce factory quality pre-forms

These compound leverage specialty hand tools reproduce factory quality pre-form end-cap crimps, downspout crimps, and gutter cover bracket slots. The compound leverage handle action multiplies handle force and transfers it to the forming head of the hand tool for ease of operation. Heavy-duty steel handles are heat-treated for additional strength. Tool heads are made of tempered steel for precision performance.

**FASTER!**  
**Reproduces Factory Pre-Forms**  
Designed specifically for gutter and down-spout forming and installation.

**EASIER!**  
**One-Hand Operation**  
Compound leverage handle action requires less hand force to operate.

**SAFER!**  
**Heavy-Duty Construction**  
Handles won't bend from hand force.

**Downspout Crimpers**  
Choose from 3-blade or 5-blade models.

**End-Cap Crimper**  
Adjustable throat depth.

**Vertical Slot Punch**  
Often required for installation of gutter cover or helmet.

**END-CAP CRIMPER MODEL**  
Securely fastens end-cap to gutter with a double cut on the inside and louver cut on the outside. Adjustable throat depth. Heavy-duty heat-treated handles will not bend from hand pressure. Tempered steel head for long-lasting accuracy.  
**MW-ECC End-Cap Crimper**  
Adjustable throat depth from 1/8" (3.2mm) to 3/8" (9.5mm).

**DOWNSPOUT CRIMPER MODELS**  
Hardened steel blades for long-lasting durability. Makes factory precision crimp to throat depth of 1-1/4" (31.75mm). Heavy-duty steel heat-treated handles will not bend from hand pressure.  
**MW-3BC 3-Blade Crimper**  
**MW-5BC 5-Blade Crimper**

**VERTICAL SLOT-PUNCH MODEL**  
Makes vertical slot hole 3/16" (4.77mm) X 1/2" (12.7mm) in bracket sometimes required for installation of cover or helmet. Also can be used for siding and trim installation depending upon position of material and desired direction of nail slot.  
**MW-VSP Vertical Slot-Punch**  
Punches 3/16" (4.7mm) X 1/2" (12.7mm) nail/screw slot.
