

Compound Leverage Siding & Trim Tools

Combine ease of operation with precision performance

These models feature precision milled punches and heavy-gauge zinc plated handles with solid ring-pin construction in addition to compound leverage handle action.

FASTER!

Dual Purpose Combo Models

Combo-Punch is both a snap-lock and a nail-hole punch. Convert function with the turn of a thumbscrew. Combo Notcher is both a lap-notch cutter and a j-channel cutter.

EASIER!

Compound Leverage Handle Action

Requires less hand force for ease of operation.

SAFER!

Heavy-Duty Construction

Handles won't bend from hand pressure. Textured Santoprene® grips prevent hand slippage and comfort user's hand.

Combo-Punch

Converts with the turn of a thumb-screw from a snap-lock punch to a nail-hole punch.

Combo-Notcher

Is both a siding lap-notch and a j-channel notcher.

Permatap Crimper

Features an adjustable throat depth setting for consistent operation.
