WINDOW FLASHING

1. Install WindowWrap in order as shown by steps.
2. Cut and diagonally and fold above weather resistive barrier above header to allow Window-Wrap to be adhered directly to substrate.
3. Fold weather resistive barrier back over head flashing and seal with WindowWrap.
4. Never let uncured caulking come in contact with WindowWrap adhesive.

Finished Window

Cut diagonally and fold weather resistive barrier

Step 1 Install Window-Wrap or WindowWrap Flex in sill.

Step 5 Install WindowWrap on header.

Step 4 Install WindowWrap on both sides of window.

Step 3 Install Window per Mfg. instillations.

Step 2 Cut and install corner patch if using WindowWrap in sill . If using WindowWrap Flex proceed to step 3.
